NSIV is on the move!

North Shore InnoVentures Expands Capabilities for Incubating Life Science and Cleantech Companies

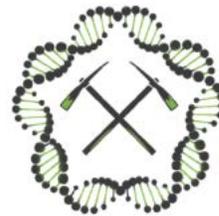

On July 27, 2017 North Shore InnoVentures (NSIV) held a ribbon cutting at its new location at Cummings Center in Beverly that promises an even

greater impact on the area's growing cluster of life science and cleantech companies. The new space includes not just biology, chemistry and electronics labs but a makerspace as well, and is much larger than the previous location. Prior to opening the new location NSIV had been scattered across six lab and office suites in the Cummings Center, a result of its organic growth. The new facilities are a testament to that growth and to what the organization has accomplished in the last six years. [Here's the rest of the story.](#)

NSIV welcomes new member Prospective Research

[Prospective Research](#) was founded with a vision to develop novel, lifesaving antibiotics using the secret language of bacteria. The MicrobeMiner™ platform mimics stimuli in the soil, providing exclusive access to untapped antibiotics.

Founders Adam Hill (CEO), Jake Cotter (COO) and Dakota Hamill (CSO) are using Life Science Consortium of the North Shore facilities at Endicott College and are also doing some of their work in the lab at NSIV headquarters. They joined NSIV as a member company in August - read more about their work [here](#).

PROSPECTIVE RESEARCH, INC.

Welcome to Lab Manager Irene Zimmer

Irene comes to NSIV as a part-time lab manager from Gordon College where she is an adjunct professor of biology. Also trained as a veterinarian with a research Ph.D., Irene has 10+ years experience in laboratory diagnostic procedures, laboratory management and related quality management systems.

Her expertise and dedication kept the relocation and set up of the labs on track and moving smoothly forward - not an easy task. She brings a wonderful sense of humor, also a valuable asset plus we now know she is an excellent baker!

Company Spotlight - Siris Medical

Siris Medical Inc., a member of [North Shore InnoVentures](#), announced that it has raised \$4.0 million in Series A1 financing. Founded with the vision of leveraging data analytics to improve treatment delivery and outcomes for patients undergoing radiation therapy for cancer treatment, [Siris](#) will use the funds to

expand the commercialization of its QuickMatch™ software.

Read the full press release on [Business Wire](#). More background on Siris Medical on the NSIV [Blog](#).
